

## ANTH & GR GRADUATE COURSES | SPRING 2017

Anthropology at Colorado State University focuses on providing students with an understanding of people and their cultures, past and present, related to the structure of the social, environmental, political and economic systems in which humans operate. Four programmatic areas define faculty research and scholarship with which students can engage: humans and the environment, international development and globalization, health and well-being, and professional methods and techniques.

### **ANTH 551 Historical Archaeology (3 Credits)**

Theory, methods, and issues in historical archaeology.

SEC 1:R 1-3:50pm

CLARK A 26

Dr. Mary Van Buren
