The Climate Reality Project

Climate Organizer Intern

About Climate Reality Project Campus Corps: The Climate Reality Project Campus Corps’ 100% Committed campaign aims to build a powerful network of student leaders working to seize the opportunity and drive a shift to clean, renewable electricity on campuses across the nation. Our goal is to not only achieve critical emissions reductions that send a signal to the rest of the country, but empower students to win concrete results on local campaigns. After the election, we know national climate policy is at risk. It’s more urgent now than ever we act locally to protect our climate.

Internship Description: The Climate Organizer Intern will work side by side with Climate Reality Project’s Colorado State University Organizer to help coordinate the following projects:

- Gather petition signatures to convince CSU to commit to 100% Renewable Electricity by 2030
- Recruit fellow students to work with you and the other student leaders on the campaign
- Work with the media, campus sustainability directors, faculty, and University President to push the campaign at Colorado State University

Hours: The start and end dates are flexible, although most interns begin in January and intern through May. Interns work between 10-12 hours/week, and the level of commitment can be tailored to your schedule. The hours will include a weekly planning meeting with the CSU Organizer and other student leaders, as well as a weekly skills training led by the CSU Organizer.

Qualifications: We are looking for students who are serious about saving the planet, have experience working with environmental or social change issues, and have demonstrated leadership experience.

Benefits: The internships are unpaid, but interns gain valuable hands-on experience in nonprofit management, work with talented staff, can earn course credit, and make a big difference.

To Apply: Email your resume to the Colorado State University Organizer, Sarah Snead, at sarah@360campaignconsulting.com.
