

Technical and Science Communication Minor Check Sheet

journalism.colostate.edu

Effective Fall 2013

Name: _____

CSU ID: _____

This minor is designed to educate highly qualified communicators who have interests in specialized academic disciplines and career fields. The accuracy and effectiveness of science and technology communication is especially important as the Internet and the ubiquity of mobile devices make the delivery and consumption of information widely available. Having the skills to interpret and communicate complicated processes provides significant career advantages in one of the highest-paying areas of professional communication.

This program prepares students for a wide range of niche career opportunities in media, corporate communication, technology-related industries, and scientific environments. Students will learn to write and manage communication efforts, focusing on turning complex ideas and processes into simple, clear messages for publication in various media. Contact Ananda Luttet to add the minor (Ananda.Luttet@colostate.edu).
